

## Latex Gloves N105

Mens orange latex rubber palm coated work gloves with elasticated wrist. Cotton/Polyester interlock back, lining.

CAT II BS EN420:1994

### Instructions for Use

**Cleaning/Maintenance** Both new and used gloves should be thoroughly inspected, especially after cleaning treatment and before being worn, to ensure no damage is present. Gloves should not be left in a contaminated condition if re-use is intended and should be cleaned as much as possible provided that no serious hazard exists before removing from hands. Excess contamination should first be removed and the gloves dry cleaned or laundered as appropriate. Leather gloves should have Lanolin put back into them in the final part of this treatment. Gloves that are cut, burnt or punctured or showing signs of fraying must not be used. If in doubt, do not use and seek professional advice.

**Transportation/Storage** Gloves should be transported and stored in dry conditions and where possible, in the original packaging.

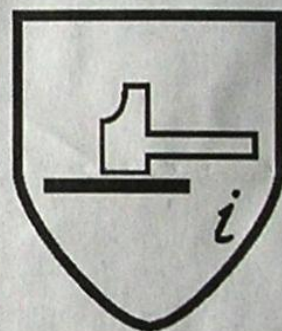

**Obsolescence** When stored as recommended the gloves will not suffer any change in mechanical properties. Service life cannot be specified and depends on application and responsibility of user to ascertain suitability of the glove for its intended use.

**General** None of the raw material or processes used in the manufacture of these products is known to have any harmful effects on the wearer. The model referred to in this specification is designed to accommodate the basic health and safety requirements and standards as laid down in EC Directive 89/686/EEC Annex II. EC type examination carried out by: Centre Technique Cuir Chaussure Maroquinerie, Parc Scientifique Tony Garnier, 4 rue Hermann Frenkel, 69367 Lyon Cedex 07.

Notified Body Number: 0075

The information contained herein is intended to assist the wearer in the selection of Personal Protective Equipment. The results of physical tests should also help in glove selection, however it must be understood that actual conditions of use cannot be simulated and it is the responsibility of the user to determine the glove suitability for its intended use.
