

# IP44 Enclosure for Celloptik

## Description

This 90mm x 90mm enclosure allows the CellOptik range to be mounted to the outside of a wall. It has a 20mm hole tilted slightly upwards for the sensor and room inside for a terminal block. The enclosure offers IP44 protection to the rear of the sensor and comes with one IP65 gland for cable entry. There are other options including a 4 way 10 amp terminal block and 2 glands.

## Applications

- Wall mounting the CellOptik
